

# OneCall Corporate Fact Sheet

## We help our clients do more with less!

### ONECALL SOLUTIONS:

#### COST MANAGEMENT

Our optimization software saves our clients, on average, 25% off their monthly invoices, and 45% off lifecycle costs.

#### VENDOR MANAGEMENT

We communicate with your wireless carriers on your behalf and assist you with negotiating contracts and discounts.

#### DEVICE MANAGEMENT

Our software maintains your wireless assets and associates them to the end users, departments, and cost centers.

#### SECURITY MANAGEMENT

We help you implement security measures to prevent loss of confidential information. We also create policies and procedures and recommend 3<sup>rd</sup>-party security software.

#### EMPLOYEE MANAGEMENT

We offer a full service help desk to assist your employees with everyday wireless issues.

#### Our Business

OneCall has created a powerful software suite that helps businesses reduce their monthly cell phone expenditures. Our solutions enable enterprises to gain visibility into, and control over, their wireless spending and all wireless devices. Unlike traditional telecom solutions, OneCall Manage specializes in wireless. Rather than retrofitting a legacy telecom solution for wireless, we have purpose-built our solutions from the ground up to optimize for complete wireless lifecycle management. By automating the mobile management process, we make it cost efficient for companies to manage their mobile devices. Our clients have experienced saving on average of 25% off their wireless invoices and up to 45% off their lifecycle management costs.

#### Market Facts

Mobile communications should make life easier, not add burdens and frustrations. When properly managed, the benefits mobile technologies provide are tremendous. Mobile technologies lower the cost of conducting business while allowing users to work more efficiently. OneCall integrates software and services to help our clients handle the tasks associating with managing mobile devices.

- "Wireline & wireless expense management market predicted to reach \$1.7 billion in 2011." – Gartner
- "US corporations' spending on wireless voice & mobile data services will exceed business spending on all wireline voice services by 2010." – In-Stat
- "Lack of visibility into wireless communications is costing companies at least \$100,000 per every million spent on service." – Gartner

#### Technology

OneCall solutions are SaaS-based. Our proprietary software automates analysis, reporting and expense management and facilitates related consulting and helpdesk services. Without **changing carriers, devices, or employee usage patterns**, a customer can achieve almost immediate payback for our fees and should normally recognize savings of 25% to 45% from its existing wireless carrier charges and related management costs.

#### Corporate Philosophy

We understand that wireless is important for our clients to compete in the global market. Our goal is to provide the best-of-class tools for our clients to manage this valuable asset. We help our clients:

- Minimize mobile communication costs to achieve immediate savings.
- Monitor usage and provide reporting that meets corporate control requirements.
- Provide clients' employees with helpdesk and procurement service assistance.
- Align mobile technologies with our clients' business strategies.
- Provide information on current trends in the mobile industry.
- Maximize plan selection according to our customers' needs.

We help our clients do more with less!
