### SECURITY MANAGEMENT

We help you implement security measures to prevent loss of confidential information. We also create policies and procedures and recommend 3<sup>rd</sup>-party security software.

### EMPLOYEE MANAGEMENT

We offer a full service help desk to assist your employees with everyday wireless issues.

# OneCall Manage

## Save 45% off your Wireless Costs

Wireless devices are proliferating across enterprises at an amazing pace. While they bring many added benefits, they also create an expense nightmare. In fact, most Fortune 500 companies spend, on average, over \$100 million in telecom services annually – with **wireless as the fastest growing segment**.

Many management companies utilize traditional methods for managing wireline in managing wireless expenses and assets. This is not effective because **wireless is dynamic**. Wireless presents unique challenges in volume commitment issues, user behavior, and device management.

### Who is OneCall Manage

OneCall offers a **SaaS-based software** suite that helps business customers easily and efficiently manage employees' use of cell phones and other wireless devices while

containing related charges from wireless carriers. Our proprietary software automates analysis, reporting and expense management and facilitates related consulting and helpdesk services.

**Without changing carriers, devices, or employee usage patterns**, a customer can achieve almost immediate payback for our fees and should normally recognize savings of 25% to 45% from its existing wireless carrier charges and related management costs.

### Why OneCall

**Purpose built for wireless.** Don't settle for a solution that was patched from a wireline solution. To get maximum savings, insist on a native wireless solution.

**Full International Capabilities.** OneCall is the first wireless lifecycle vendor to offer full capabilities.

We provide each customer with a complete **Internal Performance Scorecard** that rates how we are performing against your goals.

**Comprehensive wireless expense and lifecycle management software** include cost, vendor, device, security & employee management.

**We help our clients do more with less!**
